

Quality Policy

Six-West Ltd provides the construction, civil engineering and marine sectors and other clients with a highly skilled survey, minerals and planning service in a strategically important and technically demanding environment.

It is the express policy of Six-West to provide this service consistently to meet client requirements and to enhance client satisfaction through continual improvement in the effectiveness of its quality management system. We are committed to meeting all applicable requirements including those of our customers.

Six West will ensure that it implements this policy throughout all its activities by requiring the strict adherence of all staff to the principles and practices of effective Quality Management and to the documented Quality Management System.

This Quality System is based upon the requirements of ISO 9001:2015. The Quality System is subject to regular review and both internal and external audit and assures clients that our services are provided under the control of the Quality System to a consistent standard.

Both the Quality policy and Quality objectives are established and reviewed in the context of continual improvement on a regular basis through formal Management Review meetings.

We shall ensure that this policy is applied across the organisation and is communicated and understood at all levels within the company. This Quality policy is available to all interested parties upon request.
